

Names

TITLE

Task:

Claim: What do you infer from your analysis of the data. This claim should be one sentence and should be able to be supported by your evidence.

- Include a running average (appropriate time interval)
- Include a trendline with equation and r^2 value

- You need not include all the points on your display graph. You may wish to show the preponderance of data as a shaded area with “extremes” noted.

Evidence for Support:

- *
- *
- *
- *

Conclusion(s):

Comments: Include interesting things you noticed, what other information that was helpful in your task
